

FOR IMMEDIATE RELEASE

GloriAnn Farms To Offer Limited Organic Line of Sweet Corn

Tracy, CA (September 21, 2017): GloriAnn Farms is excited for the return of its limited-availability organic offerings, which will be available approximately June – October 2018. Supplies of organic sweet corn will be out of the West Coast region, and GloriAnn Farms is expecting another successful harvest of delicious organic GloriAnn Sweet Corn.

The return of GloriAnn Farms' organic offering maximizes the company's year-round supply, with conventional sweet corn in 4- and 8-count value-added packs rounding out the product line. GloriAnn Farms offers a full line of options under both the GloriAnn and Majesty labels, including foodservice products and retail tray packs with or without husk in a variety of pack sizes and available in bicolor, yellow, and white.

"We're very excited to bring back our organic sweet corn this coming year," says owner Mark Bacchetti. "We believe it will again be a great addition to our year-round supply, and are looking forward to another successful crop."

We hope to see you at PMA Fresh Summit! We'll be serving up zesty GloriAnn Deconstructed Street Corn at booth #142!

About GloriAnn Farms

GloriAnn Farms is one of the nation's leading value-added sweet corn shippers. With processing facilities in both Northern and Southern California, GloriAnn Farms supplies its customers with high quality sweet corn year-round.
